PRODUCT DISCONTINUATION

Dear Fluenta Customer,

Further to our notification letter of June 2007 in which Fluenta AS informed of the discontinuation of FGM 130 production, we hereby notify that spare parts, service and support for FGM 130 will be discontinued as follows:

- Delivery of spare parts: no longer than September 2014
- Delivery of support and service: no longer than September 2015

Some of the spare part types may be limited in availability. The deadline for their possible delivery automatically expires when the remaining inventory is depleted.

Fluenta AS reserves the right to accept all valid warranty claims for discontinued product orders subject to this notice for credit only, unless a replacement order is otherwise agreed upon by Fluenta.

We request you to carefully review this information and notify your purchasing offices and buyers to place your company's final orders for available discontinued spare parts or an upgrade to the new generation product as soon as possible.

On behalf of Fluenta AS, we appreciate your understanding and assistance in helping us to help you minimize the impact of this product discontinuation on your company. While we regret any inconvenience this announcement may cause, we would be pleased to offer you the enhanced and improved FGM 160 as an upgrade to our older products. We look forward to our partnership in the years to come and we will continue to bring you the absolute best in flare gas metering products and services.

Please contact our sales representative to receive answers on your inquiries regarding product or this discontinuation notice.

Sincerely,

A handwritten signature in black ink, appearing to read "Maria Borlik".

Maria Borlik,
Quality Assurance Manager
